

Tasuku Okuda

Senior Engineering Manager, IU Data Connect Department
LY Corporation

Okuda-san joined LINE Corporation as a new graduate in 2013, and since 2023, following the company merger, has been with LY Corporation. Currently, he is serving as a Senior Engineering Manager in the IU Data Connect department. His team's mission is to build a robust and high-performance self-service streaming/batch pipeline platform using Flink, Kafka, Spark, Airflow, Elastic-search, Kubernetes, and Iceberg within the data analytics environment known as "IU (Information Universe)." Additionally, they're aiming to accelerate LY's business with data by providing these capabilities stably to internal users.
